Strahinja Djurnic

ABOUT ME

I have been studying physics for a long time and I was disappointed by lack of the equipment and experiments in general. So I decided to try myself out in IT science. I'm around computers my whole life so it naturally comes to me to like coding. Also, I see a lot of possibilities for the workplace and improvements of my skills.

I finished Javascript course organized by www.itbootcamp.rs foundation. Since then I have been watching tutorials and courses all over the internet for over a year. Some of my work and ideas you can find on my Github page or you can take a look at my portfolio (<https://strahinjadjurnicportfolio.netlify.app>).
